

High Definition, Networked and Fanless Media Player Appliance

NEOCAST® Media Players

NEOCAST® Media Players are purpose-built media appliances from Real Digital Media designed to store and play dynamic digital signage and promotional content.

With extreme reliability in a compact design, NEOCAST® Media Players provide the precise control and versatility required to handle nearly any visual marketing application. With up to 160 GB of content storage, NEOCAST® Media Players combine video, audio and graphic storage, as well as control and playback features to create the foundation for distributed digital signage and narrowcast networks.

NEOCAST® Media Player Z

NEOCAST® Media Player Z takes digital signage promotions and corporate communications to the next level with increased processing power, resolution and throughput for delivering rich-media. The product offers extreme reliability, hours of content storage and supports a variety of video, graphical and audio formats, including WMV HD, MOV, MPEG 1, 2 - 4, Divx, VOB, PNG, JPG, GIF, FLV and Macromedia Flash.

Key Benefits

- Fanless Design
- Networked device
- Low cost and high reliability
- Simple installation
- Verifiable playback of content
- Multi-Zone Partitioning, Landscape and Portrait Modes
- Supports majority of video and graphical formats
- Supports High-Definition Video Playback
- Supports HTML
- RS-232 Serial Controls
- Supports sleep mode with select displays without separate serial connection

Centralized Management

NEOCAST® Media Player performance is optimized and managed by the NEOCAST® Media Server software. Player management functions include: media player configuration, multi-zone partitioning, portrait and landscape modes, content playout logging, and distribution of digital content using standard Internet protocols. The result is the fusion of visually compelling video and graphics with targeted and timely messages to better attract and reach your audience 24x7x365.

Key Features
